**Aldis Teams with Signal Communications Corporation Expanding the Aldis Distribution Channel Throughout New England**

OAK RIDGE, TN - Aldis Corp., a leader in next generation traffic management systems, announced today the addition of Signal Communications Corporation to the Aldis strategic sales channel serving cities and municipalities with more efficient and cost effective intersection and highway video traffic management solutions.

Signal Communications Corporation will provide the entire line of Aldis GridSmart traffic solutions including the Spectra 360<sup>TM</sup>, designed for intersection traffic management utilizing video tracking and the Optima 360<sup>TM</sup>, which adds support for vehicle counting data and pedestrian handling. Ultra 360<sup>TM</sup> (available in 2010) will provide a complete intersection management solution including such features as vehicle preemption and dilemma zone functionality.

“We are excited to team with Signal Communications and their talented staff expanding our distribution network into New England,” stated Eric Seabrook, Vice President of Sales and Marketing for Aldis. “They have decades of success in alarm and emergency communications, and we see a great fit for their expansion into traffic management serving the Northeastern United States.”

“The Aldis GridSmart system has proven to be an exciting, cost effective and innovative traffic management solution for our customers. Aldis’ approach to intelligent traffic management will revolutionize the industry,” stated Robert E. Lapham, President of Signal Communications Corporation.

Under the terms of the agreement, Signal Communications Corporation will provide the Aldis GridSmart solutions exclusively throughout Maine, Massachusetts, New Hampshire, Rhode Island and Vermont. Current GridSmart customers will continue to receive sales and services directly from Aldis with the addition of local support from Signal Communications Corporation.

**About Signal Communications Corporation**

Signal Communications Corporation designs and manufactures a variety of Emergency Communications, Alarm Reporting and Personnel Notification devices and systems offering solutions in the fire, security and force protection areas.
